Forsyth Barr Commentary

MCY's CESG rating is relatively broad-based, with solid scores across all categories, except for the E score. As a 100% renewable electricity generator, its emissions credentials are strong, with the potential for a perfect score when it develops an emissions reduction target and makes a Net Zero commitment for its operations. It has an A Social score, benefitting from an impressive health and safety record and human rights policy, as well as its disclosure of key diversity metrics and living wage commitment. Its Governance rating is also solid, in line with the sector average, suffering marginally due to its majority NZ Government ownership, considered a blocking shareholder. MCY's E category is a weakness and could be improved through the development of a waste and water management policy and commitment to the circular economy.
