Blending Sustainability into the Formula: The a2 Milk Company's (ATM) score improved versus 2023, which in the context of this year's changes is a good result. The driver of ATM's improvement is its Carbon score, in large part driven by further development of its climate disclosures. A key operational change during FY24 was ATM commissioning its electrode boiler at Matura Valley Milk. Within Governance, its score was weighed down by: (1) auditor tenure of 11 years (negative score), and (2) a negative score in relation to financial reporting integrity over the past five years – we are of the view that ATM didn't act with integrity during FY21.
