**Forsyth Barr Commentary**

Developing Well: Winton (WIN) did improve its score this year which we were encouraged to see, but it wasn't quite enough to shift its C+ grade. Progress in the Carbon section was a key highlight, with its score improving from a D to a B-, benefitting from a growing track record of disclosure and alignment with climate disclosure standards (CDS). We expect this to continue to improve for WIN, as its focus shifts to the longer term. Aside from the Carbon section, WIN's scores did stagnate a touch. We think this is reflective of the low hanging fruit being picked last year. We look forward to seeing what it does next on this ever-evolving agenda.
