Radius Residential Care (RAD) reported a solid 1H25 result, with several operational metrics surprising to the upside, despite continued macroeconomic challenges. Revenue rose marginally from the prior comparable period (pcp) to NZ\$85.4m, as growth in occupancy and premium accommodation revenue offset the impact of one less care home operating during the period. These operational improvements and impressive cost discipline flowed through to EBITDAR per bed rising +10% in 1H25 versus the pcp. NPAT rose +39% on pcp, benefiting from the overall reduction in market interest rates, renegotiated facility rates and lower levels of debt. Operating cash flow and AFFO also grew strongly. RAD continues to prove its acumen as a cash-generative cash operator, supporting a resumption of dividends with a fully imputed 0.65cps interim dividend declared. We lift our estimates due to the solid operational progress delivered. Our spot valuation increases +1cps to NZ\$0.29.

### What's changed?

- Earnings: NPAT estimates lift +9%, +10% and +5% in FY25, FY26, and FY27 respectively, on operational improvements.
- Spot valuation: Our spot valuation lifts +4% to NZ\$0.29 on higher near-term earnings.

#### Solid 1H25 operational performance improvements and the premium revenue mix

RAD's operational improvements exceeded expectations across several core metrics. EBITDAR per occupied bed (non-annualised) increased +10% to NZ\$13.4k in 1H25, implying upside to our prior estimate of NZ\$25.5k for FY25. Improving profitability was supported by cost-discipline and economies of scale as average occupancy rose from 91.9% in 1H24 to 92.3% in 1H25 (93.4% at period end). The proportion of beds with accommodation supplements rose to 70%, outpacing last year's 68%, and further reinforcing RAD's strategy to capitalise on the demand for premium accommodation services. Lower-than-expected employee costs (-2% on pcp) added to the favourable picture, as industry-wide wage pressures abated, with operators across the sector now fully staffed.

### Capital management helps reduce funding costs as RAD turns to growth

RAD made progress in reducing debt and financing costs, with drawn debt of NZ\$73.3m down -NZ\$2.6m in the half year versus FY24 (net debt reduced modestly by -NZ\$300k). This led to a -21% drop in finance costs in 1H25 versus 1H24. RAD completed the sale of the Arran Court care facility for NZ\$19m in January 2024, using the proceeds to reduce debt.

### Bolt-on acquisitions and development to support growth

Albeit relatively small, the acquisition of a 51% stake in Cibus Catering expands RAD's service portfolio, adding complementary synergies to its core operations. Although details have not been disclosed, RAD expects the acquisition to be immediately earnings accretive. RAD has also advanced its development plans, securing resource consent for new villas at Matamata and progressing its Christchurch Belfast site.

### 1H25 results analysis

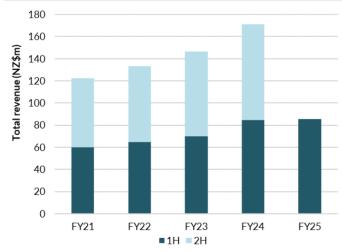

RAD delivered a robust 1H25 performance, showing steady growth across key operational metrics. Total revenue rose +1% from 1H24 to NZ\$85.4m, with improved occupancy rates and a higher proportion of beds with accommodation supplements, partially offset by one less facility operating following the sale of Arran Court. EBITDAR per bed increased +10% over 1H24, underscoring RAD's focus on operational improvements and disciplined cost management. Underlying EBITDA reached NZ\$10.6m, a +14% increase from 1H24 (normalising for the sale of Arran Court). NPAT rose +39% due to substantial reductions in finance costs and impressive employee cost management. Operating cash flow of NZ\$6.6m met expectations, while AFFO at +NZ\$3.6m slightly outperformed forecasts, allowing for RAD's resumption of ordinary dividend payments. A fully imputed interim dividend of 0.65cps was declared, set to be paid on 19 December 2024.

## **Earnings revisions**

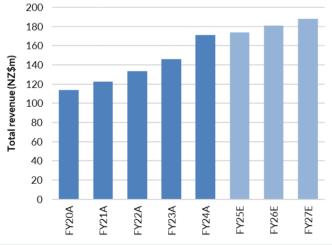

Following a stronger-than-expected performance in 1H25, we upgrade our near-term EBITDAR per bed forecasts, supported by higher premium accommodation changes. While higher D&A and finance costs partially offset these changes, NPAT rises +9%, +10% and +5% across FY25, FY26 and FY27 respectively. RAD's 1H25 included ~NZ\$1m of non-underlying costs, which are not expected to be incurred in future periods. We pull back our medium-term dividend growth trajectory modestly to provide room for development opportunities that are in progress, plus the potential for prioritising further debt repayment.
